Case Study Structure

- CRM Dashboard Design**
 - Project Overview**
Project: CRM Dashboard | Role: UI/UX Designer | Tools: Figma
 - Problem**
Users were facing difficulty managing customer data and tracking activities due to complex dashboards and scattered information.
 - Research**
 - Reviewed existing CRM dashboards
 - Studied user workflow and task flow
 - Identified usability issues in navigation
 - User Flow**
Login → Dashboard Overview → Customer Management → Activity Tracking → Reports
 - Wireframes**
Created low-fidelity wireframes to organize modules and improve data hierarchy.
 - UI Design**
Designed a clean and structured dashboard interface with reusable components and scalable layouts.
 - Prototype**
Interactive prototype created in Figma to demonstrate dashboard interactions.
 - Result**
 - Simplified dashboard navigation
 - Improved data visibility
 - Better user productivity
- HPSCB Bank Internet Banking Portal**
 - Project Overview**
Project: Internet Banking Portal | Role: UI/UX Designer | Tools: Figma
 - Problem**
Users faced difficulties navigating banking services and performing transactions due to outdated UI and complex user flows.
 - Research**
 - Competitor analysis of banking portals
 - User journey analysis
 - Identified usability and accessibility issues
 - User Flow**
Login → Account Overview → Fund Transfer → Transaction History → Service Requests
 - UI Design**
Designed a clean and structured dashboard interface with reusable components and scalable layouts.
 - Result**
 - Improved navigation for banking services
 - Better financial data visualization
 - Enhanced user experience for transactions
- Pynk Lady – E-commerce Website**
 - Project Overview**
Project: Fashion E-commerce Website | Role: UI/UX Designer | Tools: Figma, Shopify
 - Problem**
The brand needed a modern e-commerce interface to showcase products and improve the shopping experience.
 - Research**
 - Studied fashion e-commerce websites
 - Analyzed user shopping behavior
 - Identified usability improvements for product discovery
 - User Flow**
Home → Product Listing → Product Details → Add to Cart → Checkout
 - UI Design**
Designed product listings, filters, product detail pages, and a seamless checkout flow.
 - Result**
 - Improved product discoverability
 - Simplified shopping flow
 - Better mobile responsiveness
- SSV Smart Account – Mobile Banking App**
 - Project Overview**
Project: Mobile Banking Application | Role: UI/UX Designer | Tools: Figma
 - Problem**
Users needed a simple and secure mobile banking experience to manage accounts and transactions.
 - Research**
 - Competitor analysis of mobile banking apps
 - Studied user behavior in financial apps
 - Identified usability gaps in navigation
 - User Flow**
Login → Account Overview → Transfer Money → Pay Bills → Transaction History
 - Wireframes**
Created mobile wireframes focusing on easy navigation and quick access to key banking features.
 - UI Design**
Designed a clean and intuitive mobile interface optimized for financial transactions.
 - Result**
 - Faster access to banking services
 - Simplified transaction process
 - Improved mobile user experience
